## **DETAILED OFFICE ACTION**

### ***Lack of Unity***

Applicants' election with traverse of Group I, claims 1-13 and 24-32, the only claims now pending, in the Response of April 14, 2008 is acknowledged.

### ***Rejections Under 35 USC 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-13 and 24-32 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contains subject matter which was not described in the specification so as to reasonably convey to one skilled in the relevant art that the inventors, at the time the application was filed, had possession of the claimed invention. There is no support in the specification as filed for the present recitation of "a solvent selected from the group consisting of C2-C8 aliphatic esters."

This is a NEW MATTER rejection.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-13 and 24-32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1, 8: In the new recitation of “a solvent selected from the group consisting of C2-C8 aliphatic esters,” it is not possible to determine the structure or identity of these compounds/solvents. It is not clear whether this term is meant to identify the acid moiety or the alcohol moiety of the intended acid, and, in either case, at least one of these moieties is then undefined.

Claims 11, 26, 30: The reference to “essentially free of the  $\beta$ -crystal form” fails to define the basis on which such purity is determined. Unless Applicants can establish that the alpha and beta forms have different IR, the reference to IR is meaningless.

Claim 32: The phrase “peaks of relative intensity over 20%” is indefinite, because the standard against which intensity is determined is not identified and the basis for the percentage (e.g., area under the peak, peak height, etc.) is not identified.

Claims 2-7, 9, 10, 12, 13, 24-25, 27-29, and 31-32 are rejected as dependent on rejected claims.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
